- Residential buildings
  - Private housing
  - Social housing
  - Students accomodations
- Nursing homes and retirement residence
- Hotels
- Education
- Sport and entertainment
- Museums and Exhibitions
- Product Design

## PROFESSIONAL PROFILE

Born in Venice, she lives and works in Milan. She graduated in architecture at the IUAV University of Venice with honors. Her degree advisor was Carlo Scarpa, with whom she then collaborate.

She began her professional career by winning competitions: a social housing building with 64 apartments in Mirano (Venice) and the High School “Leon Battista Alberti” with 40 classrooms, library, lunchroom and gymnasium in Abano Terme (PD)

Sensitive and creative, she tackles various themes of planning: private and public residences - social housing - education - sport - entertainment - retirement houses, for hospitality and leisure time - without forgetting the urban scene

She deals with the design of new buildings and the re-use and renovation of existing ones. Between 1990-2010 she worked to renovate several social housing buildings owned by ALER built between 1925-1930 in Milan: 500 apartments in the Stadera district, 300 apartments in the Mazzini district. The result for such long-lasting work has been the upgrading of good old architecture and its adjustment to today's habitat standard.

With constant focus on new technology and eco-friendly materials, she creates comfortable and enjoyable spaces that take into consideration economy and energy saving.

In addition to her specific professional activity she takes an interest in writing, organization of meetings and art exhibition installations.

She worked as a consultant for several annual fairs in Bologna and Rimini.

As for Expo Milano 2015, she worked on the design and general supervision of the Israel Pavillon interior exhibit.

Recently she has devised a new kind of tourist settlement on Lake Maggiore (Varese, Italy) suitable for people of all ages.

## SOME CLIENTS
